**Biotechnology** is racing forward with a flurry of new discoveries connecting race and genetics. Learn how genetic technologies are affecting public health, racial disparities and race categorizations in your community. Join the public debate. Come to our forum on genetics and race.

**Speakers:** Michael Risher, ACLU of Northern California, Racial Disparities in Databanking of DNA Profiles; Troy Duster, New York University, Ancestry Testing and DNA; Osagie Obasogie, UC Hastings, UC San Francisco, Race, Biotechnology and the Need for Race Impact Assessments

This Event is Free of Charge

The Council for Responsible Genetics (CRG) fosters public debate about the social, ethical and environmental implications of genetic technologies. CRG works through the media and concerned citizens to distribute accurate information and represent the public interest on emerging issues in biotechnology.

Generations Ahead brings diverse communities together to expand the public debate and promote policies on genetic technologies that protect human rights and affirm our shared humanity.
